DETAILED ACTION

Response to Arguments

1. With regards to the remark, "Applicant respectfully requests formal acknowledgement of the consideration of foreign patent document WO98/19105 filed on May 7, 1998, in a future communication", the examiner has considered the abovementioned patent on November 24, 2004 in a previous Office Action and resubmits a copy of the initialed and signed PTO 1449 for applicant's record.

Allowable Subject Matter

2. Claims 1-13 and 17-18 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With regard to Independent Claims 1 and 7, the applicant has sufficiently cited and narrowly defined a planar light source device that reads over the prior art, specifically a light guide plate that includes a plurality of refractors on an incident surface, wherein each of the refractors has a different light emission angular distribution that is configured and corresponds to different colors of light emitted thereon.
5. With regards to Independent Claim 18, the applicant has sufficiently amended the claim, which is patentably distinct with respect to a hologram placed between the light source and the light guide plate, and is configured to diffract light at different angles and arranged in order that wavelength dependence of transmittance at a viewing direction in the liquid crystal panel is canceled out by wavelength dependence of luminance at the viewing direction in the planar light source device.

Art Unit: 2875

6. The prior art fails to teach or suggest the combination of structural elements disclosed and claimed herein, and all subsequent dependent claims are allowed.
7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
